### ABOUT THE SEMINAR

One day Seminar on IoT for third and final year students was organized by the Department of Computer Science and Engineering on 28th June, 2017. There were total of 83 participants, who attended the seminar, among them 44 from third year and 39 from final year. The experts were invited from UX Business Solutions, Nandanam, and Chennai.

IoT (Internet of Things) is an advanced automation and analytics system which exploits networking, sensing, big data, and artificial intelligence technology to deliver complete systems for a product or service. These systems allow greater transparency, control, and performance when applied to any industry or system. IoT systems have applications across industries through their unique flexibility and ability to be suitable in any environment. They enhance data collection, automation, operations, and much more through smart devices and powerful enabling technology.

The motive of this seminar was that students can understand the grooming technologies in the area of IoT. Also, it could be beneficial to the students for developing a novel project work.
