

DIP TECH 13 UNDER 18 SCIENTISTS AWARD

Innovation is a great thing, which cannot be achieved by all. Only a few students or people innovate or discover something new, which can be of much useful for the people. Sometimes their innovation will be recognized neither by the concern authorities nor by the people.

But both can be achieved if there is a stimulation, which can guide the innovators. Adhi College of Engineering and Technology had taken this initiation in its hands.

Ten reputed polytechnics were selected, and the students of those polytechnics were asked to innovate or create some new things or machineries which would be displayed inside the Adhi College premises.

Surprisingly a number of students enrolled their names and it had become a grand exhibition. In that exhibition students demonstrated their creations, innovations, which were very interesting and also appreciable.

At the end of the day, an awareness meeting was held. In the meeting, students, who participated in the science exhibition were awarded 'under 18 scientists' and prizes were also' given.

Mrs. Sujatha Maran, CEO, Adhi College of Engineering, encouraged the polytechnic students, by her valuable guidance. Dr. A. Devaraju, the Principal explained them how to make their bright future and also he gave them the career guidance.
