

## **SMOKELESS BOGI**

Bogi, which is celebrated a day before the Pongal festival. Usually people collect all the unwanted and old things and burn them in front of their houses, people think that by doing this they can get rid of the old things so that new things will enter into their houses. On this day we can very well see the streets are covered with smoke, especially children burn the tyres, which emit carbon monoxide, which affects our breathing system directly.

So, Adhi College of Engineering and Technology had taken this issue and conducted an awareness program on 12.01.2011, i.e., a day before Bogi.

A rally from the college to Walajabad, covering six kilometers, with pluckcards and banners, was flagged off by our CEO. Tmt Sujatha Maran. All the faculties and the students, marched towards Walajabad, crying out the slogans against the air pollution and requested the people not to burn plastic and rubber articles always.

At the end of the rally, Dr. A. Devaraju, The Principal, Adhi College of Engineering and Technology, addressed the gathering, and gave alternative ideas for celebrating smokeless Bogi.

Nss Team of Adhi College of Engineering and Technology had organized this rally in a grand manner and issued handouts to the public regarding the air pollution.

Mrs. Sujathamaan (CEO) initiate the rally for smokeless bogi
