

Report on Guest Lecture on CONSTRUCTION PRACTICES

On 10-9-18 afternoon, we attended the guest lecture on the topic of construction practices which was given by Mr. Viganarajan one of the member of V.V.TITANIUM and groups. He gave a clear idea about the construction practices that takes place in the site in recent days.

He started his lecture from the site clearance and ended up with surface finishing of the structure. He also discussed the types of cement that are used and test conducted in the construction field recent days. In addition to that he explained the sequence of activities briefly like marketing, excavating, sand filling, pcc work, rebar, shuttering, etc., with suitable pictures.

We acquired more knowledge about our field through this lecture and we request our respectable staffs to arrange more guest lecture like this.

Thank you
