INDUSTRIAL VISIT TO SANSBOUND –THE NETWORKING SCHOOL, CHENNAI

Third year ECE students have visited the SANSBOUND – The Networking School, Chennai on 17th July 2018 .Mrs.S.MaryCynthia, Assistant Professor, ECE has aindustrial visit coordinator, she has coordinated the visit. We would like to extend my gratitude to management people for giving the opportunity to visit SANSBOUND The Networking School, Kodambakkam, Chennai.

INDUSTRY PROFILE

SANSBOUND - The Networking School, Chennaiis the networking school in Chennai. They offer the CCNA, RHCE, Microsoft exchange server, CCNP Routing, AWS, VMware and citrix, MCSE, Networking and cloud computing.

Topics Discussed

Mr.Sathishkumar in Sansbound networking school welcomed our students and explained about the networking.

> * How to Form a network
> *Unique identifiers of network
> *Open system interconnection
> *Mac and IP address
> *Network interface card
> *Server and services
> *Domain name system

Computer networks allow information sharing by allowing connected people or computers to access information on databases distributed in different locations. Without a computer network, it would take a long time to select and transport the required data from the database to the requiring users. With computer networks, we can conveniently access the databases to retrieve data.

Student`s feedback:

It was very useful to gain a knowledge about formation of networking system and the importance of network.
