INDUSTRIAL VISIT REPORT ON TESLA MINDS, CHENNAI

Date of Visit: 14-07-2017

About **28 Students from third year of Electronics and Communication Engineering** visited the tesla minds in Chennai. The industry deals about antenna design and manufacturing components.

The students group started from ACET campus at 9.00 a.m. and reached the TESLA MINDS campus at 11.30 a.m.

Training In-charge Address:

The training in-charge **Ms.Janavi.P** was addressed the students about the recent technologies in RF industry, how it had created big era in technology industry. They were also discussed about the Acoustic Reality, Google glass. Wearable antenna and speakable Robot etc, and how all these devices become very useful for day to day human life style.

Next session was handled by **Ms.S.Preethi** who made students to understand about RF harvesting. Because of this technology we can produce large amount of power from small devices.

They were also taught about RF components design and manufacturing and they were encouraged to students for doing their project in the field of RF antennas.
