REPORT OF TRAINING PROGRAM ON “NON-DESTRUCTIVE TESTING AND SURFACE TESTING”

Date: AUGUST 21- 24, 2017

Venue: Advanced training institute, Guindy

Attending students: Mechanical Final Year.

The Department of Mechanical Engineering, ADHI college of Engineering arranged one week training program on “Non-Destructive Testing and Surface testing” from August 21st to 24th. The training program was conducted at Advanced training institute, Guindy under ministry of skill development and entrepreneurship.

ABOUT THE TRAINING PROGRAM

The training program was about “Non-Destructive Testing and Surface testing”. Non-destructive testing (NDT) is a wide group of analysis techniques used in science and technology industry to evaluate the properties of a material, component or system without causing damage. The terms nondestructive examination (NDE), nondestructive inspection (NDI), and nondestructive evaluation (NDE) are also commonly used to describe this technology. Because NDT does not permanently alter the article being inspected, it is a highly valuable technique that can save both money and time in product evaluation, troubleshooting, and research.
